

NAWIC NE Mission Statement

Purpose

Attracting and retaining women in the construction industry.

Vision

Our success will mean that diversity, inclusion and fairness is the norm across a construction industry that is efficient, balanced and thriving.

What will NAWIC NE do?

The work of NAWIC NE will fall into two workstreams:

- Promote careers in the construction industry to young people and in particular young women
- Support, champion and celebrate women throughout the duration of their construction careers.

How will NAWIC achieve this?

- Engagement with schools, colleges and universities through careers events, talks and support
- Make female role models within the industry more visible through online promotion and exhibition
- Support young women entering the industry
- Mentoring throughout women's careers
- Provide further education through CPD events focussed on technical aspects alongside career development and leadership
- Promotion of diversity and the benefits of this to industry and organisations through events and campaigns
- Collaborate with other networks, organisations and professional bodies within the region
- Establish male allies across our local network
- Hold events that allow women to build their network and find peer support.
